

Public Notice

Attention Residents: Upcoming Water Line Maintenance and Meter Replacements

We would like to inform you about scheduled maintenance work on the water meters in our community. Starting July 27th, 2024 and continuing periodically on weekends until completed, PeopleServices will be replacing water meters throughout the area. During this time, the water service will be temporarily shut off to allow for the necessary work to be completed. This time should not exceed 2 hours per meter location. There are locations that will require pit raising, those locations will need additional time to be completed.

Thank you for your continued support and engagement.
